

Another ISO Accreditation for QALSURV Environmental Solutions *and move to larger premises to support expansion*

QUALSURV Environmental Solutions (QES) has recently gained Certification of ISO/IEC 17025, enabling them to carry out air monitoring and 4 stage clearance. This certification now forms part of an impressive list of accreditations and compliant awards which clearly establish them as a major player in the Management of Asbestos Industry.

QES moved in January to new offices in response to their continued growth both Nationally and in International markets. The high class office suite based at Moretec Office Park in Leeds houses a skilled team of QES Industry experts specialising in all aspects of Asbestos Management. The extended team have now moved to the bigger offices from their original base at Thorpe Park, Leeds.

QES has taken on further Asbestos Specialists who are fully trained and qualified in the field to ensure the customer has the best possible people working alongside them. Supported by a dedicated team based in Leeds and a wider team based around the country, they are in an ideal position to support projects across the UK.

QALSURV Group currently has offices in Warwick, Shrewsbury and Leeds that enables them to service clients on a **national platform**. It provides property owners, duty holders, contractors, architects and engineers with a complete range of solutions for their commercial projects from conception through to financial close out. In terms of their developing International footprint personnel are also based in Belgium and the UAE supporting on-going construction projects.

QES Head Office,
Moretec Office Park, Leeds.

QALSURV Environmental Solutions is both CHAS and Construction Line compliant. They specialise in all aspects of asbestos management including:-

- ▶ **Surveys – supported by ISO/IEC17020**
- ▶ **Project Management**
- ▶ **Awareness Training**
- ▶ **Sampling and Testing**
- ▶ **Report Management**
- ▶ **Data Management**
- ▶ **Air Monitoring and 4 Stage Clearance – supported by ISO/IEC 17025**

Chris Earl, Director of QES says “With the strong relationships that we have created across a robust and loyal client base, we are now in an excellent position to develop the relationships further with our new additional accreditation. This additional capability enables us to manage all areas of the Asbestos Management process. Since starting in 2008, we have worked to identify our clients’ exact requirements and developed the

business to ensure we are positioned to support every step of the process in order to maintain our consistent, professional and personal customer service.”

As existing and new clients require further management across a variety of projects, QES is always looking to add to their team with fully qualified, experienced Asbestos Specialists. Career opportunities are available nationally and would welcome the opportunity to hear from anybody who is actively looking to join a dynamic and expanding team.

To ensure you are complying with your duties in the management and control of asbestos under the Control of Asbestos Regulations please contact:-
